Professional Summary

Senior Frontend Engineer with over **5+ years of expertise** in architecting scalable, high-performance web applications, specializing in **Vue.js (since 2021)** and **React.js (since 2025)**. Proven success in delivering complex **Fintech platforms** and enterprise-grade dashboards using **TypeScript**, **React 19**, and **Vue 3 (Composition API)**. Expert at driving **25% performance gains** through advanced optimization and managing data-heavy interfaces with **Vue Macros**, **Pinia**, and **RTK Query**. Highly proficient in leading **Agile** workflows within **Jira** to deliver secure, pixel-perfect, and maintainable UI architectures.

Key React & Specialized Projects

- **Money Management Platform – (Fintech Dashboard)**
 - Developed a scalable financial analytics dashboard using **React 19** and **TypeScript**.
 - Implemented centralized state management with **Redux Toolkit** and **RTK Query** for accurate, real-time financial data handling.
 - Built interactive **Chart.js** visualizations for income, expenses, and savings trends.
 - Integrated **GSAP** and **Framer Motion** for smooth scroll and UI animations, alongside **Three Fiber (Three.js)** for interactive 3D elements.

- **Real Estate Platform (GIS Mapping)**

- **Developed** GIS-based mapping features using **React.js** and **Leaflet** to provide high-performance spatial data visualization.
- **Implemented** complex plot boundary rendering and interactive property insights, ensuring accuracy and smooth user interaction.
- **Architected** a reusable component library for map layers and markers, significantly reducing development time for new features.

Technical Skills

- **Frontend Frameworks:** Vue.js (Vue 2/3 Composition API), **Vue Macros**, React.js (React 19), Nuxt.js
 - **State Management:** Pinia, Redux Toolkit, RTK Query, Vuex.
 - **Languages & Styling:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, **Tailwind CSS**, **Vuetify (2/3)**.
 - **Testing & Tools:** Jest, Vue Test Utils, Cypress (basic), Vite, Webpack, Git, Docker.
 - **Specialized:** Three.js (React Three Fiber), GSAP, Framer Motion, Leaflet (GIS), Chart.js.
 - **Project Management:** Jira, Agile/Scrum, Kanban.
-

Professional Experience

Frontend Developer | Anwar Technologies (Feb 2024 – Present)

- Architected scalable Vue 3 applications utilizing Vue Macros to enhance (DX) and streamline component logic.
- **Managed and maintained project workflows in Jira**, ensuring timely delivery of sprints and effective task tracking within an Agile environment.
- **Improved performance by 20–25%** through lazy loading and optimized rendering, significantly enhancing user retention and experience.
- **Implemented unit testing** for Vue components using **Jest** and **Vue Test Utils** to ensure code reliability and stability.
- Mentored junior developers and ensured pixel-perfect UI using **Vuetify 3** and **Tailwind CSS**.

Frontend Developer | Logic InfoTech Ltd (Jan 2023 – Feb 2024)

- Developed responsive **Nuxt.js** applications and GIS-based property mapping features using **React.js** and Leaflet.
- **Reduced page load times by 15%** through strategic code-splitting, lazy loading, and asset optimization.
- **Collaborated** closely with design teams to deliver **pixel-perfect** and highly intuitive user interfaces using **BootstrapVue**.
- **Integrated RESTful APIs** to ensure seamless data synchronization between the backend services and the frontend mapping layers.

Frontend Developer | Ultrawave Digital (Sep 2021 – Dec 2022)

- **Maintained** and scaled large-scale **Vue** and **React** applications, utilizing **Tailwind CSS** and **Vuetify** for consistent design language.
- **Optimized performance**, successfully reducing load times by 10% through efficient mobile-first responsive design and optimized asset delivery.

- **Refactored** legacy code into modular, reusable components to improve maintainability and team development speed.
-

Education

B.Sc in Computer Science & Engineering
Northern University Bangladesh
(2013 – 2017)
